Senior Product Manager, Hardware Enablement, Chrome OS Platform

Minimum qualifications:

- Bachelor's degree in Computer Science, related technical field or equivalent practical experience.
- 5 years of product management experience leading consumer electronics/hardware products.
- Experience working with SoC manufacturers and/or consumer electronics OEMs.
- Experience managing a team of product managers.

Preferred qualifications:

- 8 years of product management experience leading consumer electronics/hardware from inception to large scale user adoption.
- 2 years of experience working with computer or mobile SoC manufacturers.
- Experience managing day-to-day technical and design direction.
- Knowledge of multiple functional areas such as Product Management, Engineering, UX/UI, Sales, Customer Support, Finance or Marketing.

About the job

In this role, you will lead a global team of product managers focused on strategy and execution for reference designs which enable an ecosystem of Chrome OS devices. As the team leader of platform hardware enablement, you will partner closely with hardware and software engineering teams and business leaders internally at Google as well as externally with key partners: SoC manufacturers, ODMs, and OEMs.

In addition to device bring-up, you will own a holistic strategy and roadmap for Chrome OS, focusing on our ecosystem scaling initiatives as well as initiatives to reduce device bring-up time and accelerate time-to-market. These important initiatives will enable more users to be able to enjoy the speed, security, smarts, and simplicity of the Chrome OS operating system across education, consumer, and enterprise markets.

Google aims to build products that organize the world's information and make it universally accessible to our users. As a Product Manager at Google, you could be working on new technologies, platforms, consumer facing products, and/or enterprise systems. The end goal will be to match you with the team that best aligns with your interests, experience, and where you will have the most impact.

Responsibilities

- Lead a global team of product managers in designing and executing on a roadmap of hardware reference designs for Chrome OS devices, combining deep technical expertise, business and market understanding, and strategic thinking.

- Partner with engineering teams and executives at SoC partners, ODMs, and OEMs to launch Chrome OS devices, aligned to market needs and timing.
- Work collaboratively with engineering teams and peer platform product management teams globally.
- Own hardware ecosystem scaling initiatives to advance and grow the Chrome OS ecosystem.
- Define and own a holistic strategy and roadmap for Chrome OS and partner with SoC providers to plan and incorporate long-term architectural technologies.
